

Configuring SAML for Atlassian JIRA version 6 on Linux

OneLogin Configuration

1. Go to **Apps > Find Apps**. Search for "JIRA" and add JIRA
2. In the subsequent page select SAML 2.0 for the Connector Version and click **Continue**.
3. Select Configuration and insert the Login URL value. If you access JIRA at http://jiraserver:8080 - you would add jiraserver:8080 to this field

← JIRA MORE ACTIONS SAVE

Info Configuration Parameters Rules SSO Access Users

Application Details

Login URL

jiraserver:8080

https://hostname:port (ie. https://server:8080)

4. Click the **Parameters** tab and select **Configured by admin**. Generally, you want to use Email name part for **Username**.

- ## JIRA Configuration

- ```
<config><certificate>MIICMICCAIIwGwIBAgIBATABDBgEAMGcx CzAJBgNVBAYTAlVTMRMwEQYDVQIDApDYWxpZm9ybmlhMRUwEwYDVQQHDAMA8GA1UECgwIT25lTG9naW4xGTAXBgNVBAMMEGfWcC5vbmVsb2dpbi5jb20wggeiEaM0GCSqGSIB3DQEBAQUAA4IBDwAwggEKAoIBAQDKvNTgqXMUv2kbVlaAeov5qQaVrbDQWj/65aaCs8CuXwC1Ks69Z3/D5qGHLdQVCR7+BhbVEiZRK/tb/LcW1qsFySX1gbGY5zqvHXjQ2ChYDofpTV8iMr7klHBXWep+pxvrknsnMUxImaH7gcvRBN9UkdXds0pXTYBho0TnCD1jEvktwKg7e02FyUgWm1xSJSYtm3IDVNSyfiWiz4H51vOuZ80ulIUoHtu5WHPdvzP3vdokRbW5akN/rE2T6ws0CuTdd+LKyxdiuuJP3MseMG8Hif9C/4wWXkxWB9amCzujsmBJuAEduKX00P7T8xyOzQ7A0BJml8eqxx/rOmr600ztAgMBAAEAwYBAAMBAA==</certificate><assertion>http://server1:8080/login.jsp<assertion><issuer>http://server1:8080/secure/Dashboard.jspa</issuer><ssotarget>https://app.onelogin.com/saml/signon/49097</ssotarget></config>
```

3. Copy the `jira_onelogin.xml` file into `JIRA_INSTALL` and `JIRA_INSTALL/bin` directory.
4. Copy the `customauth-jira-6.1.jar` file into `JIRA_INSTALL/atlassian-jira/WEB-INF/lib` directory
5. Open in your text editor the file named **`seraph-config.xml`** which can be found on the Jira server into `JIRA_INSTALL/atlassian-jira/WEB-INF/classes` directory
6. From within this file, do the following:

- ```
<param-name>link.login.url</param-name>
<param-value>/login.jsp?os destination=${originalurl}</param-value>
```

- b. Comment out the following line:

c. Add the following before the `<services>` tag

```
<authenticator class="com.onelogin.jira.saml.SSOAuthenticator"/>
```

d. Save and close the seraph-config.xml file

7. Open in your text editor the file named loginform.jsp located in JIRA_INSTALL/atlassian-jira/includes directory

8. From within this file, do the following:

a. Find the line: `<%@ page import="com.atlassian.jira.web.filters.JiraLoginInterceptor" %>` and add the following on the line below it:

```
<%@ page import= "com.onelogin.jira.saml.SSOAuthenticator" %>
```

b. Within loginform.jsp locate the following line:

```
request.setAttribute("loggedInUser", jiraAuthenticationContext.getLoggedInUser()  
== null ? null : jiraAuthenticationContext.getLoggedInUser().getDisplayName());
```

c. Add the following immediately after:

```
if(request.getParameter("SAMLResponse") == null)  
{  
    String redirectURL = request.getSession().getAttribute("reqString").toString();  
    response.sendRedirect(redirectURL);  
}else{  
  
    if(jiraAuthenticationContext.getLoggedInUser() != null)  
    {  
  
        if(request.getSession().getAttribute("os_destination") != null)  
        {  
            String os_destination =  
                request.getSession().getAttribute("os_destination").toString();  
            response.sendRedirect(os_destination);  
        }else{  
            response.sendRedirect("/");  
        }  
    }  
}
```

d. Save and close the loginform.jsp file

9. Restart the Atlassian JIRA service on the server.
